COURSE TITLE

SQL Basics: Data Retrieval - Single Table

CHAPTER TITLE

Summary analytics (MIN, MAX, AVG, GROUP BY)

- 1** Knowing summary analytics in SQL will enable you to perform AD HOC analysis which is an important business use case.
- 2** MAX, MIN, and AVG are the common summary analytics function of SQL.
- 3** You can define a custom column header name by using the 'as' clause.
- 4** GROUP BY clause will help you to create a summary of metrics such as average, count, etc., for selected column(s).
